AHSAN ALI

Unity / Game Developer • C#, Multiplayer, Mobile

Dhaka, Bangladesh | +880 1799 589 966 | ahsan015015@gmail.com | Portfolio: ahsan015015.github.io/Portfolio | GitHub: github.com/ahsan015015

PROFESSIONAL PROFILE

Results-driven Unity Game Developer with 3+ years shipping 2D & 3D titles on mobile and real-time multiplayer platforms. Currently leading development of a live multiplayer arena game — architecting scalable gameplay, lobby/matchmaking, real-time sync (Photon Fusion) and in-game voice (Vivox). Strong foundation in C#, clean architecture and end-to-end game production from prototype to Google Play release. Currently completing a B.Sc. in Computer Science. Experienced and comfortable working fully remote across time zones, with a proven track record of delivering in distributed, international teams.

CORE SKILLS

Game Engines: Unity, GDevelop

Programming: C# (professional), OOP, SOLID, Unity patterns, Lua (Luau), Playmaker

Roblox: Roblox Studio, Luau scripting, game & monetisation features, published live experiences

Multiplayer & Backend: Photon Fusion, Firebase (Auth / Firestore / Realtime DB), Vivox, Photon PUN

Game Design: Gameplay mechanics, level design, UI/UX implementation, game feel, retention loops

2D / 3D & Art Pipeline: 2D & 3D environments, Blender (intermediate), importing & optimising art, animation, audio

Monetisation & Ops: IAP, AdMob, Appodeal, Yodo1, Google Play Console (release, store listing, testing)

Tools: Visual Studio, VS Code, Git & GitHub, Photoshop, GIMP, Premiere Pro

Soft Skills: Problem-solving, analytical thinking, agile & remote collaboration, ownership

PROFESSIONAL EXPERIENCE

Lead Game Developer

Oct 2025 – Present

Visiontillion | Riyadh, Saudi Arabia (Remote)

- Lead development of a **real-time multiplayer arena game** for a small cross-functional team, taking ownership of architecture and delivery from concept to live.
- Engineered core gameplay mechanics, player authentication, Firebase-based friend systems, and **scalable real-time synchronisation** of game state across clients using Photon Fusion.
- Designed and built **lobby & matchmaking flows** and integrated Vivox for reliable, low-latency in-game voice communication.
- Maintained clean, modular C# architecture and optimised networking and performance for a responsive cross-device experience.

Game Developer

Jan 2025 – Sep 2025

Gamalith Studio | Bangladesh

- Developed casual 2D puzzle and hyper-casual titles in Unity **end-to-end, from prototype to release** across Android.
- Implemented core mechanics, progression systems and procedural content; integrated art, animation and audio with polish on every build.
- Optimised performance, memory and load times across low-end devices within tight weekly release cycles.
- Contributed level design, environment layout and gameplay features to a **live Roblox cleaning-simulator ("OMG This Place Is DISGUSTING")**, scripting interactions and polish elements in Lua (Luau) within Roblox Studio.
- Collaborated closely with designers and artists in a fast, agile remote workflow.

Unity Developer

Aug 2024 – Nov 2024

RMGames Studio | Bangladesh

- Built interactive **3D environments and core gameplay systems** in Unity for a metaverse product.
- Optimised level geometry, lighting and rendering to maintain performance while adding social & engagement features.
- Contributed to cross-platform builds, bug fixing and quality assurance throughout the cycle.

Game Developer

Mar 2022 – Dec 2023

Word Puzzle Studio | Bangladesh

- Shipped **multiple casual mobile games from prototype to Google Play**, owning gameplay, UI, level design and overall polish.
- Implemented scoring, rewards, animations and sound to strengthen game feel and retention.
- Integrated IAP and ad mediation (AdMob) to build a sustainable monetisation model.
- Handled release pipeline — store listing, testing, analytics and iterative updates.

EDUCATION

B.Sc. in Computer Science — University of the People (online) (In progress — self-paced programme)

HSC (Higher Secondary) — Sheikh Burhanuddin Post Graduate College, Dhaka (2020)

SELECTED WORK & PORTFOLIO

- **Real-time multiplayer arena game** (lead) — live client/server project using Unity, Photon Fusion, Firebase and Vivox.
- **Casual 2D puzzle & hyper-casual titles** — published on Google Play; IAP + ad-driven.
- **Metaverse 3D experience** — interactive environment with social features in Unity/Blender.
- **Roblox cleaning-simulator —** "OMG This Place Is DISGUSTING" (Gamalith Studio), live with cleaning tasks, tool upgrades, timed rewards & progression — built with Lua (Luau) in Roblox Studio.

ADDITIONAL INFORMATION

Remote experience: Proven in fully remote, cross-time-zone teams. Open to remote opportunities worldwide and available to collaborate across time zones.
